## Work experience

📅 02/2020 – PRESENT 🌐 GIRONA, ESPAÑA

### Software Engineering internship, Broadband communications and distributed systems

I started at "BCDS" in 2020 as an intern in my first year of collage. During this time I've been working on some of their projects and they have been teaching me a lot of things related to computer science.

- I am currently working on their new web page with tecnologies such as SpringBoot, React, Thymeleaf, Git and MariaDB
- I have been researching at some network metrics like "ATTR" and "LCC" because in our group we have a strong network attack simulator.
- I taught myself how to use HTML, CSS and JS so I started to build a personal web as an online CV but it is still in progress.

## Education

📅 09/2019 – PRESENT 🌐 GIRONA, ESPAÑA

### Computer Engineering University of Girona

I am currently in my second year of Computer Engineering and I finished the first year with excellent marks, an honor and an average of 8.5.

📅 03/2020 – 07/2020

### Web development tools

#### Udemy

I started an Online course of HTML 5, CSS 3 and JS to teach myself the basics of how to develop a web page

📅 09/2018 – 07/2020 🌐 GIRONA, ESPAÑA

### English

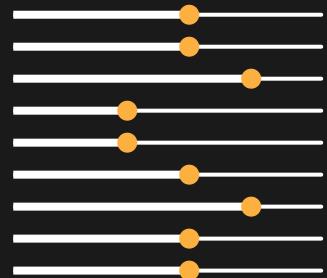

#### EOI (official school of languages)

I started in 2018 studying B1 level, in 2019 I studied B2.1 level and due to my excellent marks, I jumped directly to C1 level and I ended up with the C1 certificate
